

Internship/Working students with XAIA Investment GmbH, Munich

Join our journey to integrate Machine Learning and Artificial Intelligence into our Financial Engineering and Quantitative Analysis

Who we are:

We are active in portfolio management since April 2009 with a focus on cross asset strategies. Our team has many years of experience in the finance industry.

What we expect from you:

- You are currently studying in a major program with a strong mathematical and analytical background
- You have a solid understanding of machine learning and/or artificial intelligence
- You have strong skills in programming
- You have already a thorough knowledge in Finance / financial markets
- You are open minded, creative, motivated and you are keen on Asset Management and its products and quantitative theories
- You are a strong team player and willing to take responsibility

These are your main tasks:

- Quantitative analysis of financial data
- Development of machine learning algorithms
